

GAILLE A. AMOLONG

AI Platform Software Engineer | Full-Stack, Security, DevOps, Computer Vision

Cebu City, Cebu, Philippines | gaille.amolong1@gmail.com | +63-960-357-4478 | [LinkedIn](#) | [Github](#) | [Portfolio](#) | [Leetcode](#)

SUMMARY

Production-focused AI and full-stack software engineer with 4+ years of experience building healthcare, legal-tech, ecommerce, mobile, and computer vision systems. I operate across frontend, backend, cloud infrastructure, security engineering, CI/CD, applied AI, and product architecture. Shipped systems serving 170,000+ users, scaled referral workflows across 5,000+ providers and case managers, launched ecommerce and image-processing workflows for 5,000+ users, and led computer vision R&D that reduced manual emblem processing from 10 minutes to 30 seconds.

Technical Skills

- **Languages:** Python, TypeScript, JavaScript, Java, Kotlin, SQL, C, C++
- **Frontend/Mobile:** Next.js, React, React Native, TailwindCSS, Nuxt.js
- **Backend:** Django, FastAPI, Node.js, REST APIs, Directus CMS
- **Databases:** PostgreSQL, SQLite, MongoDB, BigQuery, DynamoDB, Supabase
- **AI/ML/CV:** OpenCV, PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, ArUco markers, RAG, AI workflow automation
- **Cloud/DevOps:** AWS EC2, ECS, S3, SES, Route 53, ALB, Docker, GitHub Actions, GitLab CI, NGINX, Cloud Run, Pub/Sub
- **Security:** OAuth2/OIDC, MFA, account lockout, secrets management, SIEM, SOC 2 readiness, security event pipelines
- **Testing:** Pytest, Jest, Cypress, E2E testing, unit testing, CI quality gates

WORK EXPERIENCE

Willed

Software Engineer, AI and Security Platform

Sep 2025 - Present
Victoria, Australia (Remote)

- Architected and developed a custom enterprise SIEM platform using event-driven security pipelines, centralized alerting, and notification routing to improve detection visibility across a legal-tech platform serving 170,000+ users.
- Designed automated security review agents and agentic engineering workflows to improve vulnerability triage, code review support, and secure development practices across multiple services.
- Contributed to SOC 2 readiness by aligning technical controls, remediation work, security evidence, and penetration testing follow-ups across authentication, infrastructure, and application systems.
- Hardened authentication flows by implementing MFA enforcement, account lockout behavior, and security controls, reducing account takeover risk across a large user base.
- Led migration work from a legacy Quasar frontend stack to Nuxt.js, improving frontend maintainability, developer velocity, and application performance by approximately 30%.
- Maintained CI/CD pipelines, automated testing workflows, and secure deployment practices to support reliable production releases.

Referrin Health

Contract Software Engineer, Platform and AI Product Engineering

Nov 2025 - Present
Minnesota, United States (Remote)

- Functionally owned major platform engineering work for a healthcare referral SaaS, helping move the product from development into controlled alpha and beta adoption.
- Stabilized core referral, organization, provider, waitlist, and case-manager workflows supporting a network of 5,000+ providers and case managers.
- Established staging and production environments, CI/CD workflows, release practices, and E2E testing standards to support safer rollout cycles.
- Developed Smartforms AI modules for workflow automation, intelligent document handling, and healthcare referral process improvement.
- Improved platform security through runtime secret handling, encrypted configuration practices, secrets manager integration, and production-readiness hardening.
- Partnered directly with product leadership on technical tradeoffs, system behavior, trust flows, legal/compliance-aligned readiness, and provider experience.
- Translated evolving healthcare workflow requirements into scalable product decisions across frontend, backend, infrastructure, and user journey design.

BitWork Solutions

Lead Software Engineer

May 2025 - Present
Melbourne, Florida, United States (Remote)

- Led a lean engineering team across frontend, backend, mobile, DevOps, ecommerce, and image-processing systems for production startup products.
- Helped launch and stabilize the 8-Ball and Badge Guru platform for 5,000+ users, owning delivery across product workflows, system reliability, and technical execution.
- Shipped customer-facing designer, internal admin, ecommerce, and production workflow features using Next.js, React, TailwindCSS, FastAPI, PostgreSQL, and React Native.
- Architected ecommerce workflows integrating Stripe and GoShippo, supporting checkout, shipment creation, order tracking, and operational flows designed for hundreds of transactions per hour.
- Led computer vision R&D for Badge Guru's rendering pipeline using OpenCV, ArUco marker detection, glare reduction, affine transformations, vectorization, and measurement correction.
- Reduced manual emblem processing time from 10 minutes to 30 seconds, improving production throughput by 20x and enabling more scalable manufacturing workflows.
- Reworked authentication and session infrastructure using NextAuth, OAuth2/OIDC, and persistent session handling, stabilizing login/logout behavior across staging and production.
- Built deployment and release practices using Docker, GitLab CI, AWS EC2, ALB, and blue-green deployment workflows with rollback support.
- Introduced SDLC standards for commits, naming, error handling, code review, deployment hygiene, testing discipline, and agentic development workflows.
- Mentored junior developers through pair programming, async code reviews, and product-engineering coordination.

Software Engineer

- Built production full-stack features using React, Next.js, Django, FastAPI, Directus CMS, PostgreSQL, and AWS.
- Migrated 4 legacy web portals into a unified Next.js and TypeScript codebase with reusable components and atomic design patterns.
- Designed REST APIs and optimized PostgreSQL query paths, reducing average API response latency by 28%.
- Implemented authentication, subscription billing, magic-link login, Stripe integration, and seat-based metering workflows.
- Bootstrapped React Native mobile application architecture using shared business logic and reusable components.
- Built automated test suites with Jest, Pytest, and Cypress, reaching 80%+ test coverage across key frontend and backend areas.
- Supported DevOps delivery through Docker, GitHub Actions, AWS EC2, ECS, ALB, S3, and DynamoDB.
- Collaborated with design and product teams to scope features, debug production issues, and ship stable releases in a lean startup environment.

AI Pilipinas Cebu

August 2024 - March 2025
Hybrid • Metro Cebu, Philippines

Software Developer Project Lead

- Led engineering delivery for AI Pilipinas Cebu's official platform across frontend, backend, and deployment workflows.
- Built modular Next.js, TypeScript, FastAPI, NGINX, and Docker-based infrastructure for scalable community platform development.
- Established Git workflow, staging previews, review practices, and code quality standards for a 6-member student engineering team.

Scriptonomy

January 2025 - March 2025
Karnataka, India, Remote

AI in Finance Technical Writer

- Authored 10 technical finance and AI articles on quantitative investing with Python, TensorFlow, and broker APIs; series amassed 12 k+ reads and a 4.8/5 avg rating
- Built and explained prototype ML finance models for developer and investor audiences..

EARLIER EXPERIENCE

Minglanilla Science High School

Mar 2023 to Mar 2024
Minglanilla, Cebu, Philippines

Head Developer

- Delivered the school's official web app (news portals + custom homepage) using Django + JavaScript, now serving 1.2 k monthly users.
- Added reCAPTCHA, secure authentication, and Docker/Railway CI; 0 downtime reported since launch.
- UX revamp increased average session duration 35 % and earned commendation from the school principal.

TidalStack

January 2024 - March 2024
United Kingdom, Remote

Full-Stack Freelance Software Developer

- Built Django REST APIs and responsive frontend components for client-facing web workflows.
- Optimized PostgreSQL queries, reducing average API response latency by 28%.

EDUCATION

Cebu Institute of Technology

Cebu City, Cebu, Philippines

Bachelor of Science in Information Technology (2024-2028)

Minglanilla Science High School

Minglanilla, Cebu, Philippines

High School - STEM Strand

High Honors & Excellency in Research and Innovation

- Built Project PHEASYCS, a physics excogitation system using artificial intelligence and deep neural networks.
- Completed qualitative thesis on the role of artificial intelligence in organizational structure and company employee roles.

SELECTED PROJECTS

- **Grape**
 - Grape is the context compiler for AI coding agents. Built to standardize project context, implementation planning, documentation structure, and agent-assisted software delivery workflows.
- **LayeredMemoryTrader**
 - LMT (LayeredMemoryTrader) is a multi-agent trading system using LLMs with human-style short/mid/long memory debates.
- **Codemmm**
 - Codemmm is an open-source agentic platform that turns your prompts into verified programming activities (problems + tests) and grades solutions in Docker sandboxes.
- **BuhAI**
 - BuhAI is a personalized diabetes assistant for Filipinos. It uses a RAG + LSTM architecture to analyze logged meals and CGM data, retrieving similar past events to provide practical advice and alerts in conversational Bisaya. BuhAI offers tailored insights to support daily diabetes management via a mobile app.
- **A.R.T.I.S.T**
 - An artificial real-time image style transfer AI system focused on applied computer vision and generative image transformation workflows.
- **DSA Visualizer**
 - Interactive algorithm visualization platform for learning data structures and algorithms.

CERTIFICATIONS

Harvard University (2020-2023) - 5 courses

- [CS50P](#) - Introduction to Programming with Python
- [CS50X](#) - CS50's Introduction to Computer Science
- [CS50Web](#) - Web Programming with Python and JavaScript
- [CS50AI](#) - Introduction to Artificial Intelligence with Python
- [CS109x](#) - Data Science with Python

DeepLearning.AI & Stanford (2023-2024) - 5 courses

- [Neural Networks & Deep Learning](#)
- [Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization](#)
- [Structuring Machine Learning Projects](#)
- [Convolutional Neural Networks](#)
- [Sequence Models](#)

Yale University (2024)

- [Financial Markets Course](#)

Udemy

- [NextJS and React - The Complete Guide](#)

AWS Cloud Solutions Architect Professional Certificate

- [AWS Cloud Solutions Architect Professional Certificate \(Coursera\)](#)

React Native - Mobile Application Development

- [React Native - Mobile Application Development](#)

AWARDS & HONORS

- Top 1 % Global Developer — [CodersRank profile](#) (2023–present)
- Top 0.7 % Next.js • Top 2 % React, Flask, SQLAlchemy • Top 3 % Django developer worldwide — CodersRank
- Top 5 % Developer in the Philippines across Django, C, NumPy, ReactJS, SQLAlchemy, TensorFlow & Flask — CodersRank analytics
- Top 9 % in Competitive Programming – [LeetCode](#)
- Youngest Software Engineer at BitWork Solutions — joined full-time at age 17
- Excellence in Research & Innovation Award — Minglanilla Science HS (2024)
- 4th Place, Division Science & Technology Fair — PhEASYCS AI Model (High School)
- Youngest Speaker in AI Conference Cebu - February 16, 2025

HOBBIES AND INTERESTS

Learning algorithms, LeetCode, physics, open-source development, hackathons, technical writing, teaching, and AI product development.
